Support for Clean Energy Technology Policy Development

Purpose: To contribute to the development of clean energy and energy-efficient technology policies at local, regional, and national levels, in alignment with SDG 7.

Scope: This policy encompasses all research, advisory, and collaborative activities undertaken by the university's faculties and research units.

Policy Statement: The University of El Oued shall:

1. Research and Development:

Conduct research on clean energy technologies through the Renewable Energy Research Unit and the Faculty of Technology.

2. Policy Advisory:

Provide expertise and recommendations to governmental bodies to inform policy development, supporting Algeria's Renewable Energy and Energy Efficiency Development Plan 2015-2030

3. Capacity Building:

- Organize workshops, seminars, and training programs for policymakers and industry stakeholders on clean energy technologies and best practices.

4. Public Awareness:

- Engage in community outreach to raise awareness about the benefits of clean energy and energy efficiency.

Responsibilities:

- The Vice-Rector for Research shall coordinate the university's efforts in supporting clean energy policy development.

Review: This policy shall be reviewed every three years to ensure its effectiveness and alignment with national priorities and international developments in clean energy.
